NOTE: ANY R WHO REFUSES OR DOES NOT KNOW HOW TO ANSWER THE FIRST THREE 0-100 QUESTIONS OF SECTION P, WILL NOT BE ASKED ANY FURTHER QUESTIONS IN THIS SECTION. THE ACTUAL SEQUENCE OF QUESTIONS VARIES AND DEPENDS ON SPECIFIC SKIPS. THE COUNTER VARIABLES USED TO TRACK RESPONSES ARE P155 (FOR NUMBER OF QUESTIONS ASKED) AND P156 (FOR NUMBER OF “DON’T KNOW” OR “REFUSED” RESPONSES). P009 IS THE SUMMARY VARIABLE FOR THIS COUNT AND KEEPS TRACK OF WHETHER OR NOT THE RESPONDENT’S FIRST THREE ANSWERS, WHATEVER THEY MAY BE, ARE ALL “DON’T KNOW” OR “REFUSED”. P009 TAKES THE FOLLOWING VALUES: 0 = COULD/WOULD NOT ANSWER PROBABILITY QUESTIONS; 1 = CAN ANSWER PROBABILITY QUESTIONS.

* A variable fieldname and code reference is shown at its first occurrence in the questionnaire, but in some cases, especially when it is common, is not shown after that.

NOTE: WITH THE COMPLETE REPROGRAMMING IN BLAISE IN 2002, QUESTIONS WERE GIVEN THEIR PERMANENT FIELD NAMES. HOWEVER, IN SUBSEQUENT WAVES CERTAIN QUESTION SERIES WERE MOVED WITHIN SECTION P, YET THEY RETAINED THEIR ORIGINAL FIELD NAMES. FURTHERMORE, WHEN A NEW QUESTION WAS ADDED, IT WAS GIVEN THE NEXT UNUSED FIELD NAME. THE RESULT IS THAT, IN SECTION P IN PARTICULAR, THE FIELD NAMES OF MANY QUESTIONS DO NOT REFLECT THEIR ORDER WITHIN THE SECTION. THUS, THIS TABLE IS PROVIDED TO AID IN LOCATING QUESTIONS CITED IN JUMPS. FIELD NAMES THAT ARE OUT OF NUMERICAL SEQUENCE ARE SHOWN GRAYED.

NOTE: RANDOM VARIABLES USED IN SECTION P:

X510 (VALUES 1 AND 2) IS USED FOR ASSIGNING RESPONDENTS TO EPISTEMIC OR APPROXIMATION FOLLOW-UP SEQUENCES AT P123 BRANCHPOINT.

X523 (VALUES 1 THROUGH 8) IS USED TO GENERATE FILLS FOR VARIABLE P170.

Next we would like to ask your opinion about how likely you think various events might be. When I ask a question I'd like for you to give me a number from 0 to 100, where "0" means that you think there is absolutely no chance, and "100" means that you think the event is absolutely sure to happen.

For example, no one can ever be sure about tomorrow's weather, but if you think that rain is very unlikely tomorrow, you might say that there is a 10 percent chance of rain. If you think there is a very good chance that it will rain tomorrow, you might say that there is an 80 percent chance of rain.
